Products	VIOSO6 tools for Analog Way
Date	December 16th, 2022
Version	6.0.4

The version (s) indicated here above has (have) been tested and validated by the QA Department.

Technical Notes:

Initial published release for Windows contains

- Vioso 6 Display Configuration for Analog Way Picturall media servers
- Vioso 6 Projector and Display setup for Analog Way Picturall media servers

Version 6.0.4 release for Windows contains
- Support for creating multiple simultaneous Vioso calibration files

Known issues with the release

- Vioso application can crash, or calibration can fail if a projection setup is created with
  o The *Whole display* selected to non-flat geometry calculation AND
  o the projection surface is only small part of the area covered by the projector.

This can cause a situation where the extrapolation takes too much system memory. The issue depends on the covered projection surface area and the available system memory. The situation can be fixed by
  o uncheck the *whole display* -option
  o limit the extrapolation: increase the extrapolation distance until the projection is fully covered

See also Vioso Helpdesk article about extrapolation distance
